DETAILED ACTION

Claim(s) 1-2, 4-14, 24-25 and 27-35 is/are pending.

Election/Restrictions

Claims 30-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 19 June 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-14, 24-25 and 27-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Wei (US 4,350,564).

Regarding claims 1-2, 4-9, 11-12, 14 and 24-25, Wei teaches (col. 3 lines 19-51) a chemical treatment method by which a metal film formed on a substrate is etched into a predetermined pattern comprising: providing a material comprising a first metal film coated on a substrate and a second metal film formed on said first metal film, said first metal film having a metal passivated layer on an exposed surface thereof, said first metal film being formed from chromium, said second metal film having a predetermined pattern, immersing said material in a dilute hydrochloric solution, whereby the chromium layer is connected in an electrolytic circuit to the aluminum layer such that the chromium is a cathode and electric current occurs to carry out an electrolysis, thereby causing

Art Unit: 1742

hydrogen to be released at the chromium interface which reduces or depassivates the oxide on the film of chromium, and then etching the chromium by contacting an exposed portion of said chromium with the dilute hydrochloric acid to form the predetermined pattern. The examiner asserts that the dipping occurs at the same time as the immersing.

Regarding claims 10, 13 and 27-29, Wei teaches (col. 4 lines 22-28) a chromium nickel alloy.

Response to Arguments

Applicant's arguments with respect to claims 1-2, 4-14, 24-25 and 27-35 have been considered but are moot in view of the new ground(s) of rejection.
